Circus musical "Nana na nana"

"Research Creation" method led to a multidisciplinary performance where both the content and the form resulted from such collective and creative explorations. This spectacle has been inspired not by a pre-existing work, but by the sensitivity and creativity of the young Lublin artists. The content of "Nana na nana" reflects on the unpredictability and randomness of life, on the chance events and its consequences. It is a spectacle about interpersonal relations, the search for a balance between individualism and collectivism. The Spectacle is also about the inner need to express oneself and one's emotions, that we all share. Sztukmistrze Foundation initiated works on the performance. They were inspired by the values of the European Youth Capital. It has been written in Lublin with a bottom up approach and is performed by local young artists. Play's form and content touch upon personal and real issues.
